Terms of Use: Policy: December 8, 2020 Version 1.4.70 Performance Better!-Minor Insect Default! Well so I want to start with this game is great and all, but here are some problems. As you know the enemy upgrades rapidly where you need to upgrade to beat them, but the prices for upgrades go crazy at their entire army level 2 you just found you and upgraded The Beach 2 to The Arthur because the prices for players who don't spend money on the game can probably do to lower the prices of half of them Start to upgrade. Also your epic soldiers think that you are practically impossible to consider in money and all but epic military prices in gems that you are trying to hate on this game, now it's just costly expensive. And there are two ways to solve these problems which is lower at 1 prices 2 costs you will increase the amount of money to pay for a more reasonable amount to pay for the upgrade which will take the average to 500. 50 per win and 50 per loss. Also I recommend that you can see the health of the enemy which will only be very helpful. But thank you for reading the result and please listen to this can probably improve your game. I love this game and am totally used to it and I had it for just two days. I have a few suggestions, No. 1: It would be great if you had an officer unit that would fight hard for soldiers and probably work like a pirate. 2: If you had a calorie that it would be great. By far the closest I have to rath-din is a little too big. Add something like a kallori man on a horse with an assignable antique or a qurabeen. 3: If you have something like a historical war mode or more specific category then I will absolutely love it. So far, I have only two rows of tinge old and some canon se if I want to be a British army. Basically, there should be a date mode where perhaps you need to defend a village against Genghis Khan or attack Degall (France) as the Viking King. Maybe add boats. 4: A little control would be good. Well now I use the Roman strategy with a shield wall and the resinator then guard blah. But! The slope always attacks rather than defend ingiting it then follow the rest (except that they are my little angels) so my army almost becomes homemade or after others just group up and charge. 5: Buildings as mentioned in the buildings of any other review, will be a joke and challenge for the game. As you can build an empire at your own will then a friend occupied with The Katapolis, Ladders, and Trebouts. All this is to say to me please read this and have a good day. This game is very fun, and very hearty, but it has serious balance issues, as if the assigning antiques they have nerfed are still powerful. Another problem is how the AK47 unit and m16 unit is powered under. They have no health and no use. If their data was improved they could have used, I see why they don't make them powerful, because they will only become the next moscares, but they need to develop a serious force. Epics are fun units, but don't much of a vauharka, they are separated for the saninatal to spend a lot, and are under power. The great example of this is that mini gun, it's not enough to deal with damage level units, and can be easily mounted. A boost needs to be save for the calorie camel, for them as much as you can Not safe for the distraction. It would be nice to be able to just clean Custom map side. Except for all the last mailies, the bhaladar saith needs a boost, guards and barcursors, guards have to try to do a spot but not enough to verify this price, the shield unit for shield walls is only better and better to attack anything because they pay less, and the barserkars don't use much. Justify the cost of as much as many cavalry horsemen. Although there are a lot of problems with balance, this game is still super fun and I would recommend the game.
